ABOUT ME

Computer Science Student with hands-on experience in Web Development, Artificial Intelligence, Machine Learning, Data Analytics, and Data Science. Skilled in C, Python, Java, JavaScript, React.js, SQL, and modern data analysis tools. Experienced in building responsive web applications, developing machine learning models, and analyzing data to solve real-world problems. Passionate about learning emerging technologies and contributing to innovative projects through internships and collaborative environments.

WORK EXPERIENCE

AI & Machine Learning Intern -
Shell Edunet Skills4Future (Virtual Internship) **Jul 2025 - Aug 2025**
Duration: 4 Weeks

- Gained practical experience in machine learning workflows, including data preprocessing, feature engineering, model training, evaluation, and optimization.
- Built a Tree Species Classification model using Python, scikit-learn, pandas, and matplotlib.
- Compared and evaluated multiple machine learning algorithms, including Decision Tree, Random Forest, and Support Vector Machine (SVM), to improve classification accuracy.

Full Stack Web Development Intern
Edunet Foundation – IBM SkillsBuild (Virtual Internship) **Aug 2025 - Sep2025**
Duration: 6 Weeks

- Completed intensive training in web development and cloud fundamentals through IBM SkillsBuild.
- Developed responsive web applications using HTML, CSS, and JavaScript while following modern web development best practices.
- Built a Food Ordering Website featuring responsive UI components, menu browsing, and user-friendly navigation.

SKILLS

- **Programming : -** C, Python, Java ,HTML/CSS, JavaScript, SQL
- **Full Stack :-** Bootstrap, React.js, Node.js, Django, REST APIs, MySQL
- **ML &AI: -** Pandas, NumPy, Matplotlib, NLP, LangChain,TensorFlow, Computer Vision, Reinforcement Learning, Generative AI
- **Operating Systems : -** Windows , Linux

EDUCATION

ANDHRA UNIVERSITY
Bachelor of Technology in Computer Science — 2023 - 2027

- **CGPA :** 8.38
- **Coursework**: Data Structures, Algorithms, Databases(DBMS), Operating Systems, Machine Learning, Artificial Intelligence, Cloud Computing, OOPs, Computer Networks.

CERTIFICATIONS

- **Python Essentials 1** And **2** - **Cisco**
- **Machine Learning** using Python - **Udemy**
- **Full-Stack AI Engineer** 2026**: ML, Deep Learning, GenerativeAI** - **Udemy**
- **Data Science : Complete Data Science & Machine Learning - Udemy**
- Certified **Data Science Professional** - **Oracle Cloud Infrastructure 2025**
- Certified **Generative AI Professional** - **Oracle Cloud Infrastructure 2025**
- **Gen AI Exchange** Program - **Google Cloud**

PROJECTS

1)Intelligent Candidate Ranking Engine - Redrob x India.Runs Hackathon Project

Github link :- https://github.com/Pavan-pa178/India_Runs_hackthon-Unemployed_Asian-.git

- Built a rule-based candidate ranking system that scores 100,000 profiles against a job description and produces a ranked top-100 shortlist with written justification for each candidate
- Designed multi-signal scoring across title fit, skill relevance, experience, career-history evidence, and behavioral availability — achieving sub-65-second runtime on CPU with no external dependencies

2)Real-Time Object Detection and Tracking

Github :- https://github.com/Pavan-pa178/Object-Detection-And-Tracking.git

- Tech Stack : - Python, OpenCV, YOLO, TensorFlow
- Developed a real-time object detection and tracking system using YOLO and OpenCV to accurately identify and track multiple objects in video streams.

3)FoodieHub — Full-Stack-Style Food Ordering Web App

Github :- https://github.com/Pavan-pa178/FoodieHub.git
vercel Link :- https://foodie-hub-pavan-pa178s-projects.vercel.app/

- Tech stack: - HTML5, CSS3, JavaScript (ES6+), IndexedDB
- Built a fully interactive UI with dynamic filtering (search + veg/non-veg), a live countdown-based delivery tracker, and state-synced cart controls across menu cards and the cart drawer. Designed a persistent client-side data layer using IndexedDB to store user accounts and order history, enabling users to view past orders with real-time delivery status

4)Tree Species Classification

Github :- https://github.com/Pavan-pa178/Tree_Species_Classification.git

- Tech stack: - Python, Scikit-learn, Pandas, Matplotlib
- Built a machine learning model to classify tree species using environmental and morphological features through data preprocessing, feature engineering, and model evaluation.
